

January 13, 1981

Memo to File:

RE: Sapphire Corporation  
Spectrum Quarry  
ACT/027/003  
Millard County

The site of this operation was inspected on January 7, 1981, by Cleon Feight and Jim Smith. There has been no apparent recent activity since the area was to have been vandalized, as noted to the Division by Mr. Cheney. All that remains in the shop area is a concrete foundation, piles of old pallets and stone and an old truck body. The road to the top of the quarry could not be located due to the fog, but it appeared, on the way into the site, that the overburden at the top of the quarry had been removed and pushed over the back side of the hill. A letter requesting the status of the operation should be sent to Mr. Cheney.
